Re: Ohio Vegetable & Small Fruit Research and Development Program

Dear OPGMA Committee,

I want to give an update on our 2020 OVSFRDP Grant titled: Establishment of Organic Blueberry Container Production System for Long-term Evaluation of Cost Viability. Due to COVID-19 restrictions to our main campus research plot location we were unable to start with this project. We returned the check of \$2580.14., We hope to reapply for this project at a future date when we have the ability to do in-person research. I am currently in COVID-19 quarantine through the month of September and cannot print or sign this document at this time. If a signature is required for this project update, I can hopefully provide that service after quarantine ends.

Sincerely,

Timothy McDermott DVM
